

VRG Components Hosts Grand Opening for New Corporate Headquarters & Warehouse

CHARLOTTE, NC USA (October 13, 2023) – VRG Components, Inc., a leading global independent distributor of electronic components, hosted a grand opening event to celebrate the opening of its new corporate headquarters and warehouse. The evening began with a blessing from Reverend Jackie Robertson and an official ribbon-cutting ceremony. Customers from as far away as Germany, suppliers, local officials, and business associates were given tours of the property while enjoying a variety of fun activities, carnival-inspired food, and local craft beer on tap. Located at 3056 Eaton Avenue in Indian Trail, NC, the new free-standing building offers expansive office space, a dedicated ESD-safe (Electrostatic Discharge) area for component inspection and testing, and a large warehouse with multiple loading docks.

VRG owners and co-founders, Verena Martin and Ruben Gutierrez, had been actively searching for the right property to support the company's growth and found it in late 2022. Renovations to accommodate ESD-safe component inspection and handling, temperature and humidity-controlled component storage, as well as quality, logistics, purchasing, accounting, human resources, sales, marketing, and management offices took several months to complete.

"As we approach our 10-year anniversary, investing in this free-standing office building and warehouse is critical to the growth of VRG Components," said CEO Verena Martin. "It is strategically located near a major Charlotte travel corridor ideal for attracting candidates from the region's well-educated talent pool. Now that we are moved in, it was important to celebrate this milestone in our history."

The larger office areas provide much needed space for the company's teams to accommodate its growth. The new ESD-safe component inspection, handling, and shipping areas as well as the expansive warehousing areas allow VRG to offer additional new services to its global customers. The building and property are equipped with the latest technology including EV charging stations for employees, suppliers, customers, and other visitors.

About VRG Components

As a woman-owned AS9120B/ISO 9001:2015 certified independent global distributor, VRG Components supplies the highest quality hard-to-find, end-of-life, highly allocated, and long lead time electronic components enabling customers to maintain manufacturing operations, bridge supply gaps, reduce costs, manage inventory, and speed time to market. Manufacturers around the world turn to VRG Components to keep their supply chains intact, reduce carrying costs, minimize the effects of price increases or shortages, and achieve accuracy in cost planning.

The company, a WBENC-certified Women's Business Enterprise, is a three-time [Inc. 5000 winner](#) and a [2023 Supply Chain Connect Top 50 Global Electronics Distributor](#).

VRG Components is a privately held company based in Charlotte, NC. For more information visit their [website](#) and [LinkedIn](#), [Facebook](#), [Instagram](#), and [YouTube](#) pages.
